

THE VANISHING SPLIT

A race result was changed after the finish.

Six runners. Six chips. One official winner.

Years after Greybridge Night 25K, archived race-night records reveal that the published result cannot be reconciled with evidence created on course.

YOUR CHALLENGE

Prove who really won.

Then determine who changed the record.

How to investigate

Three acts. One timing rule. Everything needed to solve the case is inside the file.

THE ONLY TIMING RULE**Manual checkpoint ± 3 sec = valid chip match****BIB**

Visible race number worn by a runner.

from

TIMING CHIP

Electronic tag that stores a timestamp - not a runner name.

MANUAL BACKUP

Volunteer record of visible bib numbers and approximate times.

MAPPING TABLE

Database link that later joins bib identity to chip times.

CASE FLOW**ACT I****WHO REALLY WON?****ACT II****THE RESULT CHANGED****ACT III****WHO CHANGED IT?**

Evidence boundary: the case asks what the records prove. You never need to invent motive, use outside sports knowledge, or search the internet.

EVIDENCE A

Raw chip board

Electronic pulses as stored. No bib number or runner name appears in this file.

CHIP	10K	15K	FINISH
C41	38:47	58:31	1:38:02
C63	38:52	58:49	1:38:11
C57	39:10	58:34	1:38:19
C72	39:15	59:40	1:39:08
C95	40:23	58:54	1:40:14
C88	40:18	59:45	1:41:03

INTEGRITY NOTE

Race-close archive: no raw pulse row was edited after capture.
